## PROFESSIONAL SUMMARY

---

Full-Stack Software Engineer with extensive experience building and maintaining scalable production web and mobile applications for enterprise clients. Expert in React, TypeScript, Node.js, PostgreSQL, AWS, and React Native (iOS & Android). Recently drove a 200% productivity increase by leading adoption of Cursor (AI-powered code editor) and modern AI-assisted workflows. Strong mentor with deep experience across the full software development lifecycle in agile environments. Open to freelance and contract opportunities.

## TECHNICAL SKILLS

---

**Strong:** JavaScript, TypeScript, Node.js, React, React Native, PostgreSQL, Express, PHP, HTML5, CSS3, Bootstrap 5, REST APIs, Vite, Cursor (AI code editor)

**Experienced:** Java, C++, Python, Go, MySQL, Oracle SQL, Tailwind CSS, Webpack, Babel, DynamoDB, MongoDB, AWS (S3, DynamoDB), iOS & Android Development

**Tools & Practices:** Git, GitHub, VS Code, Heroku, AWS, Figma, Slack, Tableau, Zoom, Vercel, AI-assisted development workflows

## PROFESSIONAL EXPERIENCE

---

**Silicon Beach Solutions LLC** — Project Lead Developer | *Newport Beach, CA* | *June 2024 – Present*

- Led maintenance, feature development, and technology updates for the high-traffic Hyundai USA test-drive website (React, Redux, Node.js, Sequelize, PostgreSQL, AWS S3) and provided architecture oversight for the Evolve+ front-end aligned with existing mobile patterns.
- Designed and implemented a scalable DynamoDB database solution for the nationwide Hyundai Build & Search Inventory application, supporting 300k+ vehicles and 800+ dealers with sub-second query performance.
- Spearheaded adoption of Cursor AI code editor and AI-assisted development workflows across the project team, achieving a 200% increase in development productivity while maintaining high code quality.
- Developed and maintained features for the Hyundai Drive mobile application (React Native) on both iOS and Android, including driver's license verification flows and ensuring feature parity with the web platform.

## KEY PROJECTS

---

### Hyundai Drive Test-Drive Scheduling Platform (Web + Mobile)

Delivered production updates across web and React Native mobile (iOS & Android). Implemented driver's license verification, improved PII/security handling, reduced Redux complexity by moving global state to local, and ensured consistent cross-platform experience.

### Hyundai Build & Search Inventory Application

Designed DynamoDB architecture and Blue/Green deployment strategy for large-scale vehicle/dealer searches. Optimized radius/zip-code queries with the Java team and created S3 import workflows that reduced nightly update costs while ensuring zero downtime.

## EDUCATION

---

**B.S. Computer Science** — Fort Hays State University (Expected December 2027)

*Pursuing degree while working full-time as a professional software engineer.*

**Full-Stack Web Development Program** — LearningFuze, Irvine, CA (2018)

*800+ hours of intensive programming (60+ hrs/week) in a simulated agile environment.*
